You must sign a contract by February 1, 2017 to qualify.

Paying for your Solar Installation:

Does financing make sense for you?

Cash or financing?

Many customers choose to pay for their solar system with cash, but now there are many financing options available to make solar affordable. Here are some of the options available to you:

The EmpowerLoan by Dividend Solar Financing

With a \$0-down EmpowerLoan offered in partnership with Sunlight Solar Energy, homeowners realize the maximum economic

benefit of solar ownership as well as a full service offering, including performance and maintenance guarantees with the financial upside of owning your system at no money down.

Other Options

The EmpowerLoan may not be for everyone one. In that case, other options available for ownership would be personal financing through your bank, credit union or other financing institutions within the state and financing programs of the CT Green Bank.

Meet Your Installer:

Sunlight Solar Energy is the official installer selected by the Town of Sterling. Find out if your house is suited for solar and how to lower your energy bills by signing up at www.solarizect.com/Sterling.

Average Purchased System Cost from Sunlight Solar Energy (est. 7kW):

	Market	Solarize Sterling Offer*
Price (based on 7kw)	\$28,000 (\$4.00 per watt)	\$24,500 (\$3.50 per watt)
CT Green Bank Incentive**	\$3,068	\$3,068
Federal Tax Credit	\$7,480	\$6,430
Your Net Price	\$17,452	\$15,002

*Base prices offered through Solarize CT exclusive of adders required by your specific property and all incentives and tax credits are estimates.

**CT Green Bank incentive estimate which may change during the course of the program
