

Attention all Roofers

The CT State Building Code states the following:

- #15 lb. felt is required under all new and stripped roofs. This has been in the code since shingles were invented.
- A 36" strip of ice and water type membrane is required on all eave edges.
- Attach shingles as per manufacturer's requirements.

During the process of your roofing job, please call for an inspection to verify these Building Code requirements.

Section R907 Reroofing

R907.3 Recovering versus replacement

New roof coverings shall not be installed without first removing existing roof coverings where any of the following conditions occur:

1. Where the existing roof or roof covering is water-soaked or has deteriorated to the point that the existing roof or roof covering is not adequate as a base for additional roofing.
2. Where the existing roof covering is wood shake, slate, clay, cement, or asbestos-cement tile.
3. Where the existing roof has two or more applications of any type of roof covering.

I have read and understood the above CT State Building code requirements for the Roof Replacement job at :

_____.
